Lego Collector

Ricardo Hernández Osorio

Computation and Telecommunication Engineer

About Me

I am a recent graduate of Computer and Telecommunications Engineering; however, my work life started much earlier than my professional studies, most of them in sales and services. I have had the opportunity to discover my social skills and test my persuasiveness as a salesman in companies such as IUSA-CELL (a telecommunications company in Mexico) and BANAMEX (currently CITI Bank). On the other hand, in the services industry, I have collaborated with VOLARIS (one of the most important airlines in Mexico) in their call center, with activities like flight reservations and especially hard flight attention that meant an enhancement to my resume. Also, in a BANORTE call center bank, my learning did not stop, especially because I could practice all my past skills. From the above, my collective skills of self-improvement, perseverance, resilience, and courage, would be proven by studying instead of leaving them behind, taking advantage of my experiences from before. Finally, and from a very special place, I would highlight my HSBC experience, where I could challenge myself in an important position as a KYC reviewer, where the details, concentration, intuition, knowledge of the retail market bank, technical skills and my passion for abstract reasoning were crucial, overall, my most important work experience

1. Career Profile

I am an analytic person with a strong proficiency to solve abstract problems through my own passion and aptitude, and on the other hand, I have developed great social skills through my own environment in the past. Since my early days at Engineering Institute, I tested my code skills, and I loved it, probably because I had studied mathematics too and my HSBC past, so I have developed for more than five years programming skills with different kinds of environments and languages. All in all, we have with me technical skills particularly tested under a bank group, sales and persuasiveness to achieve goals, customer contact and negotiation ability, abstract reasoning, passion for programming and mathematical thinking, and especially resilience, among other things.

2. Experiences

Lead Developer

Startup Hubs, San Francisco

2015 - Present

Describe your role here lorem ipsum dolor sit amet, consectetur adipiscing elit. Aenean commodo ligula eget dolor. Aenean massa.
